PROFESSIONAL PROFILE

As a highly capable Junior Software Engineer, I possess strong theoretical knowledge and practical experience in projects involving Python, JavaScript, React, HTML, CSS, Git, and GitHub. My focus is always on ensuring that users can easily interact with the program. I am a team player who cultivates effective communication and working relationships to ensure daily processes run smoothly.

My objective is to leverage my knowledge and experience in a dynamic organization that provides robust opportunities for professional growth and development while utilizing my skills and expertise to contribute to the success of the company.

EXPERIENCE

HyperionDev's Software Engineering Bootcamp program in partnership with UK Department for Education. Out of 20,000+ applicants, I was selected for one of 1500 fully-funded places from the Department for Education.

- Immersed myself in a comprehensive curriculum, mastering essential software engineering skills.
- Software development principles.
- Proficient in data structures, algorithms, and object-oriented programming in Python.
- Applied unit testing and the Arrange-Assert-Act pattern for structured testing.
- Utilized mock testing for object-oriented design and excelled in debugging techniques.
- Built RESTful APIs following software engineering principles.
- Tackled intricate coding challenges and consistently delivered high-quality solutions.

Achievements:

- Finished the Bootcamp as one of the top performers, securing the remarkable eighth place out of 406 students.
- Demonstrated dedication, hard work, and exceptional problem-solving abilities.
